TEXTILE OIL 15 K

Definition of

It is a well compensated parachemical based oil. The anti-rust and anti-oxidation properties of textile oil 15 K are increased.

Places of Use

It is used in various machines in the textile industry, in the needles of bending and winding looms and in the assembly of tie machines. In addition, it can be used in places where low viscosity oil can be used, in hydraulic systems and bearings.

Features and Benefits

- It perfectly protects all sinkers, needles and bearings against rusting and corrosion.
- Extends the life of the part thanks to its high anti-wear properties.
- It does not cause varnishing and adhesion thanks to its high oxidation resistance.
- It helps to increase the production efficiency and quality.

Typical Features *

ISO Viscosity Grade		ISO VG
		15
Density @ 15 ° C, kg / m³ Flash	ASTM D 4052	0.867
Point, COC, ° C Viscosity, 40 °	ASTM D 92	196
C, mm²/s	ASTM D 445	15
Viscosity, 100 ° C, mm² / s		3.6
Viscosity Index	ASTM D 2270	94
Pour Point, ° C	ASTM D 97	- 12

^{*} Values may differ from production to production.
